Technology Consultants Group

Technology Consultants Group is team of audio video technicians and engineers with specialized proficiencies, experience and training. We take pride as professionals to engineer and install commercial and residential low voltage systems of the highest quality and task specific performance. We work very closely with all our clients in order to achieve the highest level of accuracy in realizing their needs; be it performance, functionality, simplicity or economy. We believe in the team philosophy and work closely with all subcontractors, architects and professionals which may be involved in the project. This philosophy is at the core of our business model and is essential for an accurate, timely and efficient project.

Affiliations and Experience

We are members of the Home Acoustic Alliance (HAA), and the National Sound Contractors Association (NSCA). We are currently working on achieving our Certified Technology Specialist (CTS) designation from Info Comm International. We are certified by Sencore Electronics for video and audio calibration and Crestron Electronics for control and automation for both residential and commercial applications. In addition we hold many other certificates by various affiliations and companies. Our key technical staff members have an average experience level of 15 years and continuously maintain and improve their knowledge with periodic training and certifications.

- VIDEO CALIBRATION
- AUDIO CALIBRATION
- RF SYSTEM DESIGN
- CONSULTATION SERVICES

OUR MISSION

Simplify,

We believe this is the single most important word in today's myriad of technological solutions and buzzwords. Simplicity to make these technologies an easy and comfortable part of our everyday experiences is key to both our residential and commercial systems' success.

Educate,

An educated and informed client is paramount to the success of the project. We make every effort to present our ideas in a clear and easy to understand format. From prints, design specifications, wiring layouts and proposals we use the latest presentation, scheduling and CAD programs to manage and convey the essential information to all involved with the project.

Integrate,

We realize every system is truly unique to each client's needs, tastes and expectations. The key to our continued success and our client's satisfaction is Simple and Efficient Integration of a combination of these technologies into a unique solution which meets your exact needs.

If you have any questions or are interested in learning more about how Technology Consultants Group can help you, please feel free to contact us to set up an appointment.
